

S-Team: YOUR STEAM TEAM!

Advantages of cleaning with steam

Cleaning and sanitizing with steam

Steam generators, by heating the water inside their boiler and transforming it into steam, are professional machines ideal for sanitizing and hygienically clean any type of surface. The high temperature and elevated operating pressure are able to dissolve dirt and completely eliminate microorganisms, bacteria and pathogens, germs and parasites (mites, fleas and ticks) in a quickly and easily way. The ability to carry out deeper cleansing operations, thanks to the combination of the cleaning power of the steam and the use of detergent solutions, allow the steam generators to tackle even the most stubborn dirt.

Ecological and economic

The ability to sanitize different materials and surfaces without the use of chemicals is one of the advantages of cleaning with steam. An economical and natural cleaning process, which does not damage the environment by using small amounts of water and reducing waste.

S-Team: YOUR STEAM TEAM!

The new team of steam generators, designed to sanitize the most different types of environments and surfaces, represents the concrete response to the needs of professional cleaning and sanitization in a quick and safe way.

Start-and-go machines, easy to use, available in two different solutions to face every kind of challenge: from the compact steam cleaner **S-Team 6**, ideal for medium-small environments, to the more capacious **S-Team 6 V** and **S-Team 10 VH** equipped with professional suction system.

Characterized by great sturdiness and extreme practicality, they are resistant and highly performing machines. **Equipped with powerful (up to 3400 W) and large boilers (from 1.5 to 3.5 l capacity) capable of producing from 4.5 to 6 kg H₂O/h steam, 6 V and 10 VH versions are accompanied by powerful suction systems (1150 W).**

The wide range of standard and optional accessories completes the offer and allows the S-Team family to go and work in any type of environment and surface (flooring, glass, steel, fabrics). **A complete set of solutions and technical features that allows to operate in different sectors, from domestic to Ho.Re.Ca, up to uses in the automotive and industry.**

Steam cleaner S-Team 6

S-Team 6 is the professional steam cleaner designed for cleaning and sanitizing environments and surfaces. The **production of dry steam at 160 °C** and an **operating pressure of 6 bar**, along with the high productivity (it is possible to recharge the machine without turning it off), guarantee excellent cleaning results without the use of detergents. R Strength and manoeuvrability make S-Team 6 an extremely versatile machine able to work in any type of environment (floors, glass, steel, fabrics and hard surfaces).

Steam cleaner S-Team 6 – Strength and productivity

Boiler:

- continuous charging boiler: it is possible to recharge the machine without turning it off.
- thanks to its **1.5 l capacity** and resistance of **3200 W**, is able to produce up to **4.5 kg H₂O/h steam**.
- it is possible to activate one or both resistances in the boiler, allowing the machine to operate at 2200 W (as well as the maximum power of 3200 W)

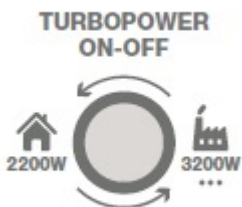

TECHNICAL DATA		
Max Power	w	3200
Max power consumption	w	3200
Boiler max power	w	3200

Steam cleaner S-Team 6 – practical and intuitive

Display with controls for an easy and intuitive control of S-Team 6 functions and immediate feedback while working.

TURBOPOWER activation button
The function that allows the professional use of the machine both in home use or commercial environments, characterized by low voltage electrical systems, and in contexts in which it operates up to 3200 W of power, such as workshops. Simply press the TurboPower button to enable or disable the function that allows to switch from 2200 W to the maximum power of S-Team 6 (3200 W).

Steam vacuum cleaner S-Team 6 V

S-Team 6 V is the steam vacuum cleaner with professional suction system designed for cleaning and sanitizing surfaces and environments. The **production of dry steam at 160 °C** and an **operating pressure of 6 bar**, along with the **powerful 1150 W vac motor**, guarantee excellent cleaning and drying results. During deeper cleaning operations, to tackle the most stubborn dirt, it is possible to activate the Detergent Function directly from the control panel.

Sturdy and resistant and extremely manoeuvrable thanks to the trolley equipped with an ergonomic handle and a practical basket for objects, S-Team 6 V is ideal for operating in Ho.Re.Ca, healthcare, transport and public institutions.

Steam vacuum cleaner S-Team 6 V – Strength and productivity

Boiler:

- continuous charging boiler: it is possible to recharge the machine without turning it off
- thanks to its **1.5 l capacity** and resistance of **3200 W**, is able to produce up to **4.5 kg H₂O/h** steam.

Steam vacuum cleaner S-Team 10 VH

S-Team 10 VH is the steam vacuum cleaner with professional suction system designed for cleaning and sanitizing surfaces and environments. The **steam production at 185 °C** and the high **operating pressure of 10 bar**, along with the **powerful 1150 W vac motor** guarantee excellent cleaning and drying results. The practical control panel allows the operator to keep all the machine's activities under control. In fact it is possible to enable both the **Detergent Function** and the **Hydrojet Function** that, thanks to a powerful jet of steam mixed with water, allows the machine to deal with the most stubborn dirt. S-Team 10 VH is the steam vacuum cleaner ideal for operating in sectors such as mechanical industry, food, health and public institutions.

Steam vacuum cleaner S-Team 10 VH – Strength and productivity

Boiler:

- continuous charging boiler: it is possible to recharge the machine without turning it off
- thanks to its **3.5 l capacity** and resistance of **3400 W**, is able to produce up to **6 kg H₂O/h steam**.
